

DR. BRETT BRAZEAL, D.D.S.
5948 Warner Ave., Huntington Beach, CA 92649

IMPLANT INSTRUCTIONS

1. The new implant crown should not have heavy pressure on it. If the bite feels heavy on it, it may need to be adjusted.
2. Good oral hygiene is important to maintain the health of the gums around the implant. It is very important to thoroughly floss around the implant – be sure to maneuver the floss below the gums and as far under the implant crown as possible, both in front and behind the crown.
3. Please call us at **(714) 846-1414** if you have any questions or concerns. You can also email to office@seabreezedental.com.
